Build Smarter:
FREE Sustainability
Training Workshop for
Construction Management

Learn sustainability best practices and actionable strategies for every phase of construction in this training. USGBC-Long Island is hosting a GPRO Construction Management training for FREE, thanks to the generous support of NYPA.

November 19th 2025
9:00AM — 5:00PM

What is this training about?

GPRO Construction Management provides practitioners with sustainability best practices and actionable strategies for every phase of construction, as well as how to avoid common mistakes. Taught by highly knowledgeable industry professionals, participants will leave the course with practical steps to direct and manage successful, sustainable, and cost-effective projects.

Who is this training for?

This 8-hour training is ideal for a range of construction professionals, including: construction managers, general contractors, experienced tradespersons, trade forepersons, owner's representatives, project managers, site superintendents, estimators, students and others interested in entering the building and construction industry.

What will you learn?

By the end of this training, you will be able to:

- ✓ Explain the key coordination issues and documentation requirements that are unique to high-performance construction at each stage of a project.
- ✓ Describe the responsibilities of the CM and project team to ensure building performance.
- ✓ Implement sustainable construction processes and communicate required information to subcontractors & trades.
- ✓ Coordinate testing, inspection, and commissioning activities to ensure intended performance.

How does this training work?

Registration is mandatory. This FREE class will be held remotely on Wednesday, 11/19/25 from 9:00am - 5:00pm, led by a highly knowledgeable instructor with industry experience.

Where?
Virtual

Registration includes access to six on-demand electives and an online exam. Students who pass the exam with an 80% or higher become a GPRO Certificate Holder.
